

Suprema Mobile Access

JUST TAP & GO

Suprema Mobile Access

Suprema Mobile Access allows you to use your own smartphone as a key to access doors, facilities and more. By using your smartphone as a credential, managing and using an access card becomes easier, faster and safer.

Fast and easy contactless solution

Support both NFC & BLE (Bluetooth 4.2 or above)

Remote management via web portal

Background mode (BLE, Standby mode)

Protected by ISO 27001 certified system architecture

Compatible with Android (9.0 or above) & iOS (7.0 or above)

Contactless mobile solution compatible with iOS and Android

Suprema Mobile Access supports both NFC and BLE(Bluetooth Low Energy) for full compatibility with different types of smartphones.

Fast and accurate

Prevents unintentional openings by controlling BLE communication distance, allowing authentication time less than a second

BLE background mode

Works seamlessly without waking up your smartphone

Remote and contactless

Suprema makes it easier to issue and revoke a mobile access card by sending an email to users.

- Saves cost of issuing cards and maintenance in comparison to physical cards
- Protects your data with ISO 27001 certified system architecture

A comprehensive system for mobile access

Using Suprema Airfob Portal, you can build your own fully functional access control system with mobile access.

- Suprema's open API's can easily integrate into your existing system to make mobile access a part of your complete solution
- Suprema's In-App SDK allows you to integrate mobile access card into your own mobile application

Easiest way to go mobile, Airfob Patch

Suprema Airfob Patch is an award-winning, innovative device that attaches to existing RF card readers to make them compatible with Mobile Access Cards.

- Airfob Patch converts Mobile Access Card's Bluetooth signal to RF card signal
- Airfob Patch works without battery, harvesting energy from RF field signals transmitted from the card reader
- A retrofit patch-on device, Airfob Patch is quick and easy to install

Apply to everywhere RF card is used
