

tedee

Open for visitors.

Smart lock makes short-term rental easier and more cost-effective.

Whether you're subletting a room, managing multiple apartments, or leasing a beach house.

 Hosting without keys

 Self-check-ins and check-outs

 Flexible booking hours

 Remote management

Give access with an app

Booking received? Grant your guests access to the rental with the app, or text them a PIN. It's like they have the keys already.

Never handle keys again

It's a hassle for visitors and yourself. Change to smart lock and never make extra, hand over, or collect keys again.

Rent remotely

Manage your place – or many properties – wherever you are. Grant access to your administrator, cleaning services, or repairs.

Control booking time

Set your rental available only in a fixed time frame: from check-in to check-out hours.

Forget appointments

They require scheduling that nobody wants – especially on vacation. Let your guests arrive at whatever time they wish.

Check the status

Smart lock activity logs and battery status are always available in the app or desktop portal.

Coming soon: channel management integration

For automatic access sharing and control, synchronised with leading booking platforms.

Rental host kit.

tedee smart lock

for keyless access.

tedee smart bridge

for remote management.

tedee keypad

for unlocking without the app.

Enter the smart world.
