## ENTRANCE PANEL

### Description

Multi-apartment entrance panels with 10" IPS screen with backlight and heated under plate, with face recognition and support of mobile access BAS-IP UKEY.

The panel has a unique feature — face recognition. This identifying technology is integrated into the BAS-IP panels and uses the camera of the outdoor panel and infrared sensors for its operation.

Once the tenants & common visitors are identified, the entrance panel can automatically unlock and voice an important message or useful information about the residential complex.

### Specifications

Panel type	<b>Multi-apartment</b>
Display	<b>10" IPS, color with backlight and heated</b>
