PROTECT Fog Cannons are now
Ajax Ready

PROTECT Fog Cannons can now be
seamlessly integrated with Ajax
security systems wirelessly,
making installation quick and
effortless.

PROTECT Ajax Ready

One of the reasons why people value Ajax and its products is the ease of use and installation and the feeling of reliable security. With the added effect of a PROTECT Fog Cannon you will have the ultimate wireless solution for your security needs.

Ajax relays can also be post-installed in all our Fog Cannons, making it possible to integrate Ajax Ready with your existing PROTECT Security System or Ajax system. Ajax Ready can be bought as a full kit, which includes two, three or four Ajax relays, DIN rail, DIN holder & Ajax cables.

BENEFITS OF AJAX READY

- Wireless or wired installations
- Control everything from the Ajax app
- Quick and simple setup in minutes
- Ajax Solutions for activation
 - Opening detectors
 - Glass break detectors
 - Motion detectors
 - Panic buttons
 - Ajax app
- Integrate seamlessly with the Ajax eco system
- Can be bought as a full kit or pre-installed
- Fits all PROTECT Fog Cannon models
- Sleek and tidy appearance without cables
- Activate fog directly from your phone

A person wearing a grey hoodie and a dark jacket is looking out of a window. The room is filled with a thick, white fog or smoke, obscuring the view. A potted plant is visible near the window. The scene is dimly lit, with light coming from the window. The overall mood is mysterious and security-oriented.

5 WIRELESS AJAX SOLUTIONS FOR ACTIVATION OF YOUR PROTECT FOG CANNON

Connect your PROTECT Fog Cannon and Ajax intrusion system through a central Ajax alarm and experience the quick installation and activation of your security system.

OPENING DETECTORS

Protect your property when doors or windows are opened by unwanted guests or when left open for ventilation. The detector senses when it's moved out of position.

GLASS BREAK DETECTORS

Secure your space with a wireless system that detects the sound of breaking glass up to 9 meters away without causing false alarms.

MOTION DETECTORS

Choose from indoor and outdoor Ajax motion detectors, with or without a camera, to detect intruders and trigger the fog system. Camera options allow for quick visual verification of false alarms.

PANIC BUTTONS

Activate the fog and secure your space in seconds with a simple click. Designed to prevent accidental activation, these buttons provide an easy and fast response when you feel in danger.

AJAX APP

Activate your PROTECT Fog Cannon effortlessly from the Ajax App. With a simple tap on your phone, you can secure your surroundings in an instant.

FITS ALL PROTECT FOG CANNONS

Ajax Ready is suitable for all PROTECT Fog Cannons and can be seamlessly integrated with any Ajax security system wirelessly. Ajax Ready can be bought as a kit, which can be installed in your already owned PROTECT Fog Cannon.

PROTECT FOQUS™	Discharges 25 m2 of fog in 25 seconds

ABOUT PROTECT

PROTECT is the world's largest manufacturer of fog cannons measured on number of units sold. We are an international company that was established in 2000. Since then, we have started to distribute our fog cannons and accessories in over 50 countries and have sold more than 150,000 units worldwide.

We are specialists in security fog, and only develop high-quality products for this purpose. Our products are safety approved and recommended by alarm installers, police, and insurance companies.

Fog security is a type of security system that protects everything from private homes to larger business premises with fog. When a fog cannon is activated, a dense cloud of fog is deployed within a few seconds, which removes all visibility in the room and makes it impossible for a thief to see anything - and what you can't see, you can't steal.
